Composition and Chemical Ingredients

Primary Components

Prestone Extended Life Antifreeze Coolant typically contains:

- Ethylene Glycol: The main active ingredient responsible for lowering the freezing point and

raising the boiling point of the coolant. It also provides corrosion protection.

- Water: Acts as a solvent and coolant medium.
- Corrosion Inhibitors: Organic acids, silicates, phosphates, or other proprietary additives to prevent rust and corrosion in engine components.
- Dyes: Usually bright colors such as orange, yellow, or green for identification and leak detection.

Chemical Hazards

- Ethylene Glycol is toxic if ingested, causing serious health issues including kidney failure and central nervous system depression.
- Handling requires caution to prevent skin contact, inhalation of vapors, or ingestion.
- The MSDS lists specific chemical hazards, including potential irritants and toxicity levels, as well as precautions to mitigate these risks.

Hazard Identification and Safety Measures

Potential Hazards

Based on the MSDS, Prestone Extended Life Antifreeze Coolant presents:

- Health Hazards: Toxic if swallowed; may cause skin and eye irritation.
